WNS collaboration

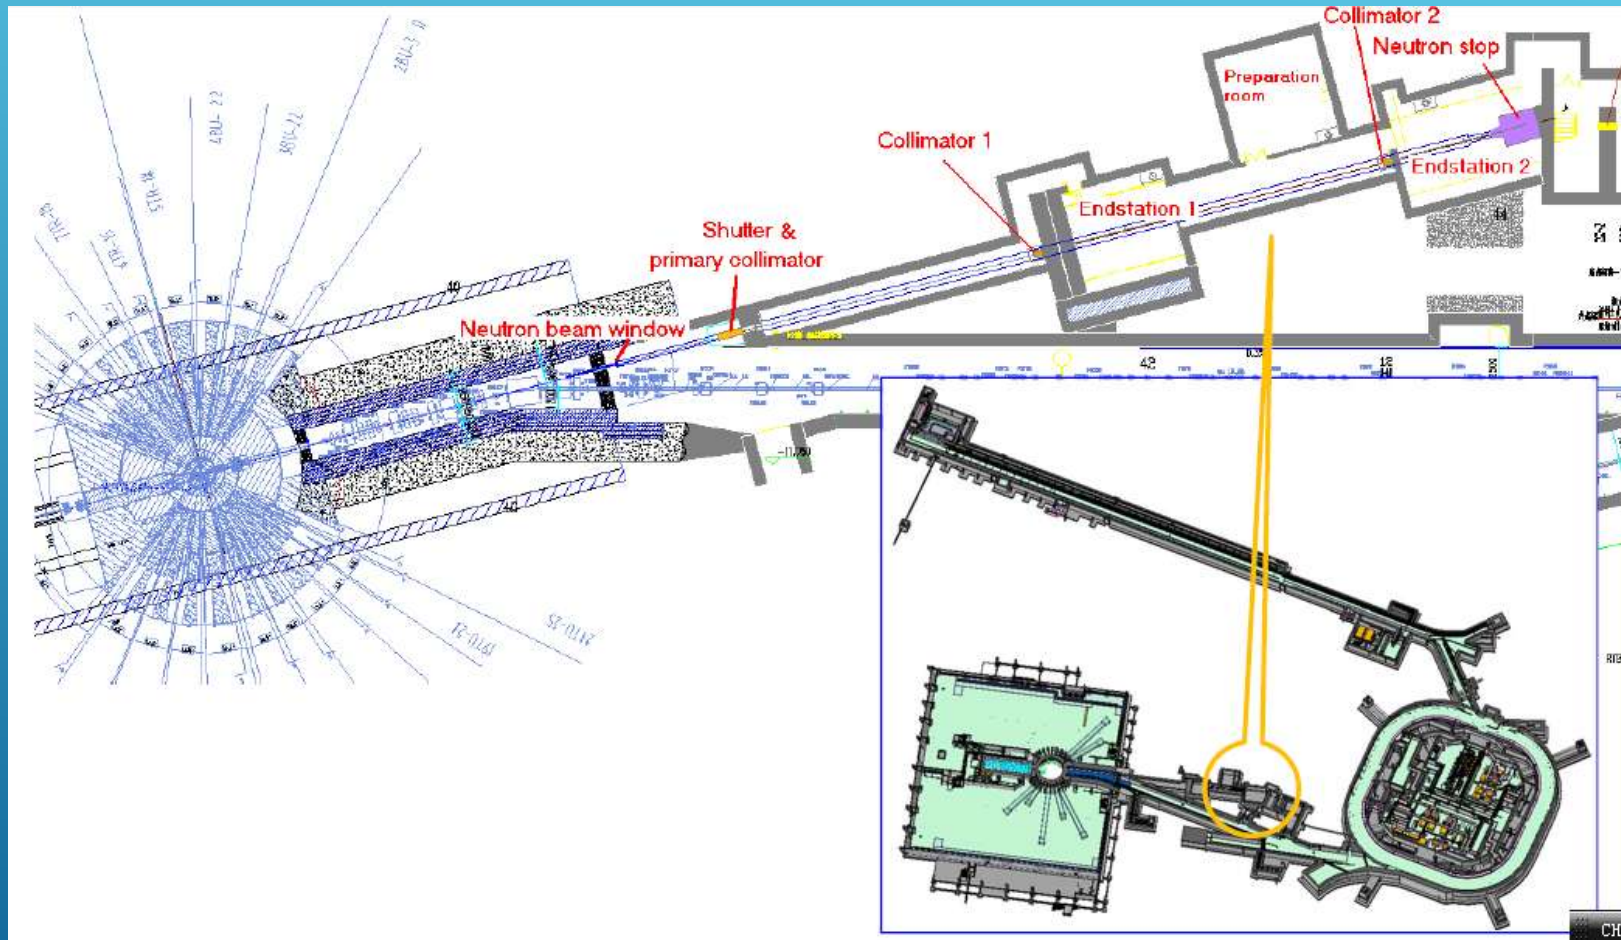

ISINN26

2018/05/28-6/1 Xi'an China

OUTLINE:

- ▶ 1 Introduction of CSNS back-n white neutron source
 - ▶ 2 Experiments of white neutron beam line
 - ▶ 3 Preliminary results and future plan
- 

BACK-N WHITE NEUTRON BEAM LINE @CSNS

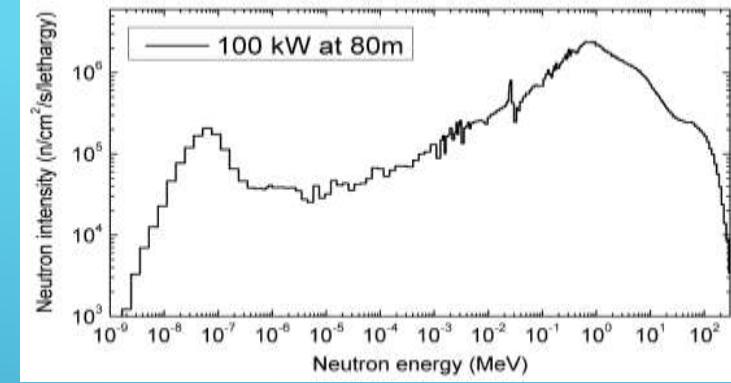

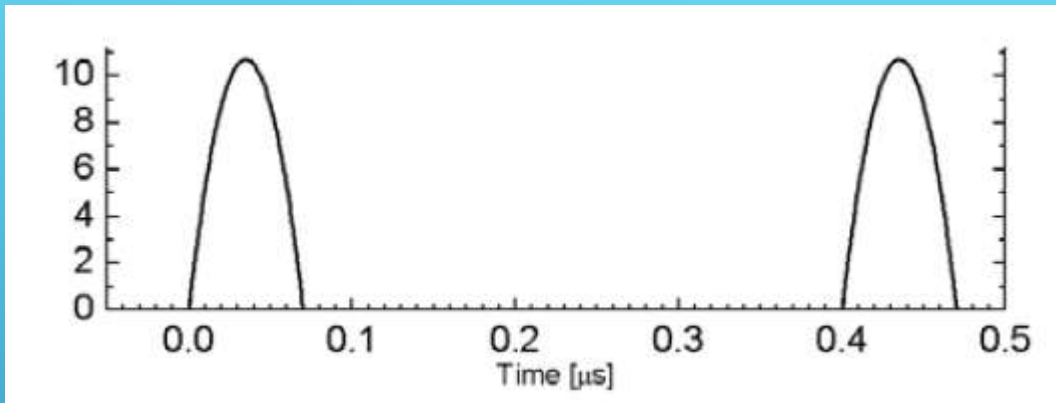

- ▶ Neutron energy spectrum;
- ▶ Neutron flux;
- ▶ Beam profile;

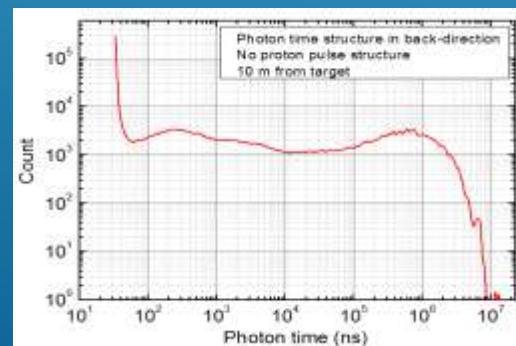

- ▶ Beam bunch Time structure

NEUTRON BEAM CHARACTERIZATION OF WNS

- ▶ Neutron energy range: eV-100MeV
- ▶ Neutron yield: $\sim 10^{16}/s @ 100kW$
- ▶ 25Hz double-bunch operation mode
- ▶ High intensity gamma-flash

NEUTRON ENERGY MEASUREMENT

▶ Li6/U235/U238..

▶ Recommend of IAEA

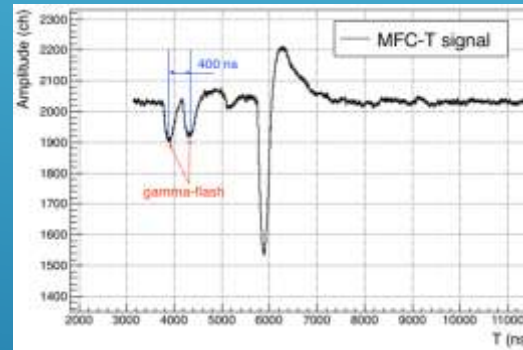

Reaction	Range	Cross section&uncertainty
${}^6\text{Li}(n, \alpha)\text{T}$	Thermal~100keV	$10^{-5}\text{eV}\sim 90\text{keV}$ <1%
		90~450keV 1~2%
${}^{235}\text{U}(n, f)$	Thermal~200MeV	Thermal 0.2%
		150keV~16MeV ~1%
		16~200MeV 2~5%
${}^{238}\text{U}(n, f)$	1.2MeV~200MeV	1.2~20MeV ~1%
		20~200MeV 2~5%

▶ Thin target

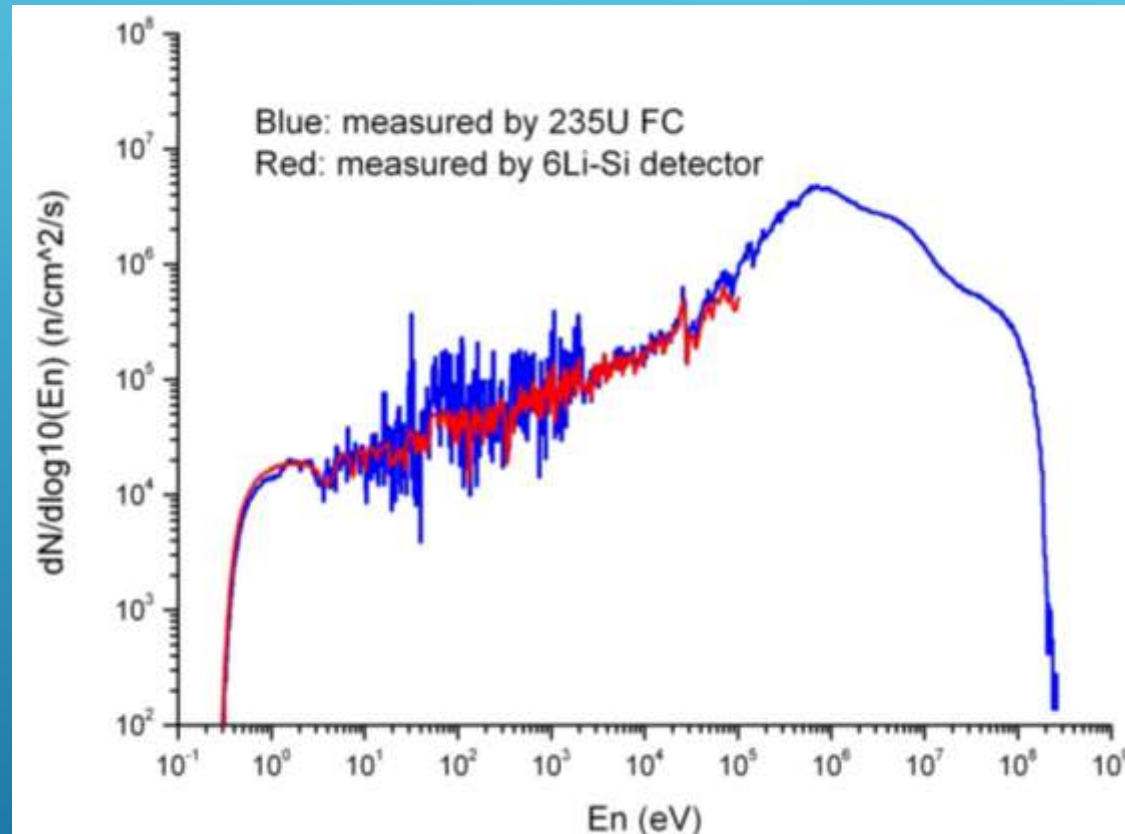

▶ ToF method

▶ Detector

$$\Phi(E) = \frac{N(E)}{\sigma(E)\epsilon N_V}$$

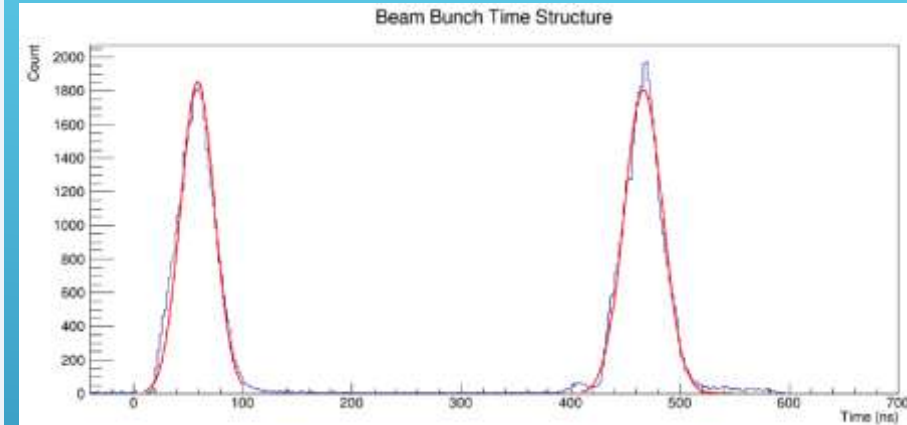

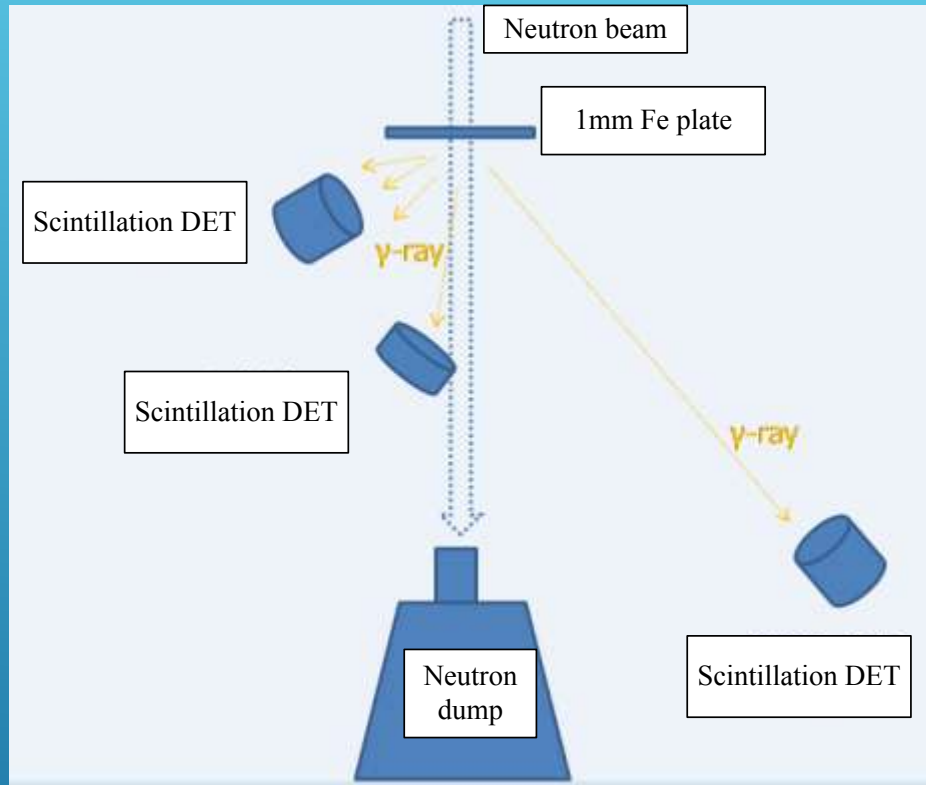

Neutron energy spectrum

BEAM PROFILE

BEAM BUNCH TIME STRUCTURE

- ▶ FWHM: 41.6 ± 2.0 ns
- ▶ Interval time: 409.0 ± 2.0 ns

OUTLOOK

- ▶ Determination of neutron energy spectrum
 - ▶ Determination of neutron flux
- 

▶ Thanks for your attention!
